

Kindermann at ISE 2023, Hall/Booth 2V675

**Perfect for new work environments:
The new ultrawide touch display from Kindermann**

Kindermann is continuing its success story in the field of touch displays. With the new 105-inch TD-30105-UW, which is ideally suited for new work environments, the company is taking on a pioneering role. In addition to the extraordinary aspect ratio of 21:9 in 5K resolution, it convinces with a future-proof hardware equipment.

A real eye-catcher

The new Kindermann touch display TD-30105-UW impresses with its 105-inch panel with an aspect ratio of 21:9 in 5K resolution. This extraordinary format has the advantage, that it offers more horizontal space for visualizations. This is ideal for displaying and collaborating in project management plans known from Agile, Scrum or Kanban. On the other hand, the special width is ideal for video conferencing. A perfect example of this is the Front Row application in Microsoft Teams Rooms, where all remote participants are shown in a gallery view at the bottom of the display. This gives the feeling that everyone is sitting at the same table. The design has also been thought through as the narrow frame is identical on all sides. Thanks to the 20 touch points, two people can work comfortably on the display at the same time. The Zero-Gap technology ensures precise input.

Powerful OPS PC on board

The touch display offers two DisplayPort interfaces that primarily support the 5K resolution, among other advantages. Of course, the bandwidth of all common ports is also available. The new Kindermann TD-30105-UW comes without an Android operating system as it relies on an integrated state-of-the-art Windows OPS PC with Intel i7 processor, 16 GB DDR4 RAM, pre-installed Windows 10 Pro, WiFi 6, and two Thunderbolt 4 ports. This ideally meets the requirements of many companies, as the existing infrastructure is mostly based on Windows applications. Another advantage of the OPS PC is that the new touch display from Kindermann can remain in use for a very long time, so if it needs an upgrade in future, it can be easily replaced, which ensures a sustainable investment.

Mobile despite size

Most common display mounts/stands are designed for sizes up to 86 inches. This is where Kindermann's special role as a manufacturer comes into play. To match its new touch display, the company optionally offers the perfect rolling stand. This allows it to be used flexibly despite its size, which means real added value.

About Kindermann

Kindermann, founded in 1861, is the oldest company in the Pro AV industry and is today one of the leading suppliers acting as manufacturer and distributor. Kindermann has always managed in an intelligent way not only to adapt to new market conditions, but also to advance technologies.

Kindermann stands for conferencing, collaboration and connectivity. The world of work and education has changed massively. Collaboration in hybrid teams and digital teaching place new demands on technical equipment. This is exactly where Kindermann comes in with its smart solutions. Smart stands for intelligent, networked, intuitively operable, but also for sophisticated design.

The company has expanded its own portfolio and is thus represented internationally. For example, the CLICK&SHOW product family is also very popular in many European countries. It shows how easily wireless collaboration and conferencing can work. The triumphant success of Kindermann touch displays is not only based on the trendsetting technology but is above all due to the intuitive user interface developed in-house. At the Eibelstadt site near Wuerzburg, series products such as table connection panels, brackets, ceiling lifts and media furniture are developed and manufactured. In addition, exclusive customer requests can be quickly implemented here.

Supplemented by a broad product portfolio in distribution, Kindermann enjoys an excellent reputation as a full-range supplier for conference, presentation and media technology, digital signage and dedicated education solutions.

As a manufacturer and distributor, Kindermann sells exclusively through qualified specialist dealers. Trade partners are supported with competent advice and individual project support - from planning to equipment and integration. Attractive special services round off the portfolio.
